PROFESSIONAL SUMMARY

Computer Science student and Frontend / Full-Stack Web Developer with hands-on experience building responsive web applications and user interfaces using HTML, CSS, JavaScript, Tailwind CSS, Node.js, and Express.js. Experienced in integrating REST APIs, working with databases, developing CMS-driven applications, debugging software, and building responsive user experiences. Freelance development experience includes translating requirements into functional web applications and collaborating with clients to deliver maintainable solutions. Strong interest in frontend engineering, modern web technologies, and building accessible, user-focused applications.

TECHNICAL SKILLS

Languages: HTML, CSS, JavaScript, Python

Frontend: HTML5, CSS3, Tailwind CSS, Responsive Design, User Interface Development

Backend: Node.js, Express.js, REST APIs, API Integration

Database: MongoDB

Tools & Services: Git, GitHub, Cloudinary, Firebase, VS Code

Development: CMS Development, JSON Data Handling, Debugging, Cross-Component Integration

EXPERIENCE

Freelance Full-Stack Web Developer

- Develop responsive websites and web applications based on client requirements and project specifications.
- Build frontend interfaces using HTML, CSS, JavaScript, and Tailwind CSS with emphasis on responsive and maintainable user experiences.
- Develop backend functionality using Node.js and Express.js and integrate REST APIs into web applications.
- Work with MongoDB and external services to support application data and functionality.
- Collaborate directly with clients to understand requirements, implement features, troubleshoot issues, and deliver working solutions.
- Use Git and GitHub to manage source code and development workflows.

Industrial Trainee – Information Technology Unit

- Assist with IT operations, technical support, troubleshooting, and software-related tasks.
- Develop practical experience diagnosing technical issues and supporting enterprise IT workflows.
- Apply problem-solving skills to investigate and resolve software and technology-related issues.

SELECTED PROJECTS

Recipe Platform with Custom CMS

- Built a full-stack recipe platform with a custom administration dashboard and content-management workflow.
- Implemented recipe submissions, moderation functionality, comments, image uploads, and responsive user interfaces.
- Integrated frontend functionality with backend services and application data.
- Designed the platform to support structured content management and an improved user experience across screen sizes.

Data Subscription Platform

- Developed a responsive web platform for browsing and interacting with subscription plans.
- Implemented dynamic frontend functionality and responsive layouts for different screen sizes.
- Applied reusable frontend patterns to create a consistent user experience.

Technology Blog

- Built a responsive, content-driven technology blog with structured layouts for presenting articles and digital content.

- Focused on responsive interface development and clear content presentation.

Comic Website

- Designed and developed a responsive comic-reading platform.
- Implemented user-facing interfaces optimized for browsing and reading digital content across different screen sizes.

Python File Conversion Application

- Created a Python desktop utility for converting supported file formats.
- Designed the application around a practical file-processing workflow and user-focused interface.

Browser Userscripts

- Developed custom browser userscripts to automate repetitive workflows.
- Improved user interaction and reduced repetitive manual tasks through browser-based automation.

EDUCATION

B.Tech. Computer Science — In Progress

Abubakar Tafawa Balewa University, Bauchi

ADDITIONAL STRENGTHS

- Responsive web development
- REST API integration
- Client collaboration and requirements understanding
- Problem solving and debugging
- Independent project development
- Git/GitHub version control
- Full-stack application development
